Description

This innovative program is designed to meet the requirements of a range of health professionals who wish to develop specialist knowledge, skills and understanding of simulation as a modality for teaching and supporting learning and assessment.

Participants will benefit from the use of an interprofessional setting, the 'state of the art' LAU-Clinical Simulation Centre with input from expert academic and clinical staff.

Objectives

Participants who complete the course will be able to:

- Demonstrate knowledge and understanding of the learning theories that underpin simulation learning and teaching.
- Demonstrate proficiency in organizing and running simulation scenarios.
- Demonstrate proficiency in the design of a program in a specific health professional context based on best evidence practice and with links to curricula and outcomes.

Format

This Diploma is presented as 3 modules over 3 days each, with hands on experience at the LAU- Clinical Simulation Center.

- Teaching, learning and simulation in the clinical context
- Applied simulation in health professional education
- Use of simulation-based education for assessment

Credits

- Five credits or 75 hours

Requirements

Doctor in Medicine, Doctor of Pharmacy, Master of Science in Nursing

English proficiency requirements as per <http://admissions.lau.edu.lb/graduate/>

International Faculty

- Ara Tekian, PhD, MHPE
University of Illinois at Chicago
College of Medicine
- Ross Scalese, MD
